

TRANSORAL LASER MICROSURGERY

Professions: Doctor Surgeon specializations otolaryngology, oncology, neurosurgery

From 15 January to 15 July 2021 asynchronous mode

1. Abstract and program

The objective of the series is to provide in depth presentation and presenter experiences of selected Head and Neck neoplasms with interactive lectures and informed video content using advanced Co2 laser technology. Stimulating cases are a key part of the webinar series and each one hour session will be moderated by a leading and renowned fellow Head & Neck leader in the European ENT Surgical community.

The webinars focused on a specific topic each week to develop your understanding and how to apply the use of Co2 lasers in Otorhinolaryngology and it's sub-specialties:

Video 1

Laser technology and it's potential applications. Patient selection for TLM and surgical instrumentation used in CO2 laser surgery will also be reviewed along with the concept of bioendoscopy in TLM and resection margins evaluation.

Session will be moderated by : Prof Witold Szyfter & Prof Malgorzata Wierzbicka, University of Medical Sciences, Poland

Video 2

A detailed user led Introduction to Transoral Co2 laser phonosurgery and a conservative approach to laryngotracheal stenosis

Session will be moderated by: Dr Isabel Vilaseca, Universitat de Barcelona, Spain.

Video 3

A detailed user led Introduction to Transoral Co2 laser in glottic and supraglottic cancers

Session will be moderated by: Prof Andrea Gallo, Sapienza University of Rome, Italy

Video 4

A detailed user led Introduction to Transoral Co2 laser surgery in oral cavity and oropharynx

Session will be moderated by: Prof Filippo Carta, Università di Cagliari, Italy
